## About ASYS Life Science

The ASYS Group is the leading automation company in electronics manufacturing. In addition to the solar and semiconductor industries, the machine manufacturer uses its expertise in the area of life sciences. The innovative systems take over

tasks from goods receipt, over the production line, to the storage of components and magazines. Over 1,300 employees at 13 locations worldwide develop and implement turnkey solutions.

## Applications

- › Point of Care (POC) Diagnostics
- › Lab on a Chip
- › In Vitro Diagnostics
- › Medical Technology Products

## Advantages

- › More than 25 years of cross-industry experience with 1300 employees at 13 locations.
- › Customer-specific and turnkey - everything from a single source.
- › GxP-compliant development and project planning of your automation lines.
